Wet Film Thickness Gauges are designed to quickly and easily measure the thickness of coatings immediately after they have been applied to a substrate. The gauges incorporate a series of notches cut into their sides much like the teeth on a comb. The wet film thickness of coatings including paints, resins, lacquers, varnishes, gel coat, etc. may be measured

SHG Series Comb Type

Type	Ranges (μm)	Overall Dimensions
SHG-100	10-100	65×36×1.5
SHG-150	15-150	
SHG-200	20-200	
SHG-700	250-700	
SHG-750	50-275 300-750	65×43×1.5
SHG-80MIL	1-80MIL	83×57×1.5
SHG-2500	300-2500	85×64×2
SHG-3000	25-3000	74×64×1

YQH Series Wheel Type

Type	Ranges (μm)	Overall Dimensions
YQH-50	0-50	50×27
YQH-100	0-100	
YQH-200	0-200	
YQH-500	0-500	
YQH-50/250	50-250	
YQH-200/700	200-700
