

# Digital Adjustable Applicator

The adjustable film coater can adjust the lower scraper up and down by adjusting the two digital differentiators above the film coater to control the gap, that is, the thickness of the final coating. When scraping, adjust the gap of the scraper every 1 micron, and the coating range is 0 ~ 1500  $\mu\text{m}$ .

## Technical Specification

型 号	KTQ-100A	KTQ-150A	KTQ-200A
Film width (mm)	100	150	200
Film thickness range ( $\mu\text{m}$ )	0~5000		
Precision ( $\mu\text{m}$ )	1	1	1
Outline dimension (mm)	114×76×115	164×76×115	214×76×115
Net weight (g)	492	560	639
Gross weight (g)	798	866	945
