

JTX- V Special fittings for washing instrument

JTX-V Digital multifunction Washability Tester(Scrub resistance, Stain resistance and Wet-scrub resistance) It is applicable to perform an Scrub resistance, Stain resistance and Wet-scrub resistance test on coated panels to define the resistance of paints, varnish or related products to scratching and wear.It can examine the scrub resistance of the coatings according to scrub counts and to evaluate stain resistance and wet-scrub resistance properties of the coating according to the contrast of before and after washing.

All kinds of washing tests-related special accessories

Name	PVC Plastic Sheet	Product picture
Type	XD-567	
main application	specially used for washing test	
Standard	GB/T 9780-2013	
Thickness of test piece	0.25mm	
Specifications	430×150mm	
Pack	100 PCs/pack	

Name	Hog Bristle Brush	Product picture
Type	XD-3804	
main application	pecially used for washing test	
Standard	ASTM D2486	
Brush head material	(Nylon+Weight,total weigh is $450 \pm 10\text{g}$,1 pair)	

Name	Stain-resistant accessory	Product picture
Type	XD-3011	
main application	special for wet scrubbing test	
Standard	GB/T 31410 , ISO 11998	
Weight	3M Scotch Brite handpads+Weights, total weigh is $135 \pm 1\text{g}$,1 pair	
Specification	96*50*38mm (steel needle exposed 4mm)	

Name	Moisture-resistant scrubbing attachment	Product picture
Type	XD-3013	
Standard	ASTM D3450	
Weight	Sponge+Weights,total is 1, 1500g,1 pair
