

AYDJ

RYDJ

Printing Proofer

This equipment is ideal for providing quick, highly accurate and repeatable samples of gravure inks under lab condition. It may be used for proofing sample, checking printability and R&D for ink products. The machine adopts engraved printing plates direct printing method. Any flexible substrate including films, paper, etc can be printed or laminated, featuring easy operation. It comes complete with: 1 Special Printing Plate for Gravure.

We also have RYDJ Printing Proofer (for flexographic ink), it adopts engraved printing plates direct printing method, it can be chosen by customers.
