

Dupont Impactor

Dupont impactor is used to test the impact resistance of plastic test pieces or paint test pieces (coating films and substrates). Put the coated surface of the test piece upward, place it under the punch of the impactor, and check its damage, deformation or falling off after being hit by a heavy hammer with a certain height.

Technical Specification

Name	Dupont Impactor
Type	DCJ
Weight drop height	50~500mm
Weight of heavy hammer	300g、500g、1000g
Punch radius	1/2"、1/4"、1/8"、1/16"、3/16"
Die seat radius	Each one has five specifications, Can meet different test needs.
Instrument size	300*250*830 mm (L*W*H)
Instrument weight	28 kg
