

## QSJ-0.5 Pneumatic Agitator

### ***I. Application:***

Pneumatic Agitator is widely used for mixing and stirring paint、 pulp、 dyestuff、 coatings and emulsion, because of using compressed air as power source, no hidden danger by fire and blade stretch ability. It is best suitable for mixing volatile and flammable paint or coatings. It is also best suitable for minor-caliber raw can and an explosive-proof workshop. It can improve work efficiency, reduce labor intensity, and improve working condition.

### ***II. Main Technical Parameters:***

1. Diameter of blade:  $\Phi 150\text{mm}$
2. Power:  $\geq 0.5\text{kw}$
3. No-load revolution:  $\leq 1800\text{r/min}$
4. No-load air consumption:  $\leq 22\text{ L/S}$
5. Applied air pressure:  $0.63\text{Mpa}$
6. Inner diameter of air pipe:  $13\text{mm}$
7. Weight:  $4\text{kg}$
